DETAILED ACTION

Response to Amendment

The Appeal Brief, filed on May 23, 2008, has been entered and acknowledged by the Examiner. Claims 1-6, 10, and 12-14 are pending in the instant application.

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Allowable Subject Matter

Claims 1-6, 10, and 12-14 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 1, specifically for the limitation of a heat-dissipating plate, mounted on the plasma display panel and thermally connected to the plasma display panel through a laminar attachment structure; wherein the laminar attachment structure comprises an annular channel which divides the laminar attachment structure into an outer closed portion and an inner portion and communicates with the external environment through at least one vacuum-pumping aperture formed at the heat-dissipating plate in combination with other claimed features of the present claimed invention.

Regarding claims 2-6, claims 2-6 are allowable for the reasons given in claim 1 because of their dependency status from claim 1.

Regarding claim 10, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 10, specifically for the limitation of a heat-

Art Unit: 2879

dissipating plate, mounted on the plasma display panel and thermally connected to the plasma display panel through a laminar attachment structure having a plurality of strips spaced apart from each other by a plurality of spaces; wherein a respective guide trench is disposed between each pair of the neighboring strips to guide out the air within the spaces of the plurality of strips, two ends of at least one of the guide trench are sealed to form a closed region which communicates with the external environment through at least one vacuum-pumping aperture formed at the heat-dissipating plate in combination with other claimed features of the present claimed invention.

Regarding claims 12-14, claims 12-14 are allowable for the reasons given in claim 10 because of their dependency status from claim 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Endo et al. (US 5,107,176) is cited to show a plasma display device.
